Measures issued in the context of the Covid-19 outbreak, provided by the European regulatory authorities and National Member States

During the first quarter 2020, the Governing Council of the European Central Bank (ECB) has decided a number of measures to ensure that its directly supervised banks can continue to fulfill their role in funding the real economy given the economic effects of the Covid-19.

As well, the European Banking Authority (EBA) issued several statements to explain a number of interpretative aspects on the functioning of the prudential framework in relation to the classification of loans in default, the identification of forborne exposures, and their accounting treatment. These clarifications help ensure consistency and comparability in risk metrics across the whole EU banking sector, which are crucial to monitor the effects of the current crisis.

For Slovenia the following National measures are relevant and could have potential impact on reported figures:

- Law requiring banks to provide moratorium to retail and corporate customers was passed by end of March 2020. The Act applies to:

- (i) banks and savings banks with seat in Slovenia and Slovenian branches of EU banks, on the lenders' side;

- (ii) companies, co-operatives, foundations, institutes (all with seat in Slovenia), sole entrepreneurs, farmers, natural persons (all if Slovenian citizens residing in Slovenia), on the borrowers' side. Debtors may apply for deferral of instalments during the period of pandemic. Expiration date for application is 15.11.2020.

- The second legislative moratorium published as of the end of November 2020 extends the date for application until 31 January 2021 and also includes changes in beneficiaries of the moratoria where natural non-citizens persons with permanent residence in Republic of Slovenia were included. The State Guarantee is applicable also for this legislative moratorium with the limit of €200 million which remains unchanged and applies jointly for both legislative moratoriums.

- The third legislative moratorium published in the end of December 2020 states that all moratoria granted under the second law are limited to period of 9 months (in the second law the expiration date was 31 January 2021) whereas other requirements from the second and the first law remain unchanged.

- All moratoria (legislative or private) are subject to forbearance measures in line with EBA guidelines.

- Due to the influence and consequences of the COVID-19 epidemic on the economy and financial system, with the goal of increasing resistance of the financial system to financial shocks, of maintaining financial stability and preventing the occurrence of interruptions the Bank of Slovenia adopted the Decision on macro prudential limitation of distribution of banks' profits which temporarily restricts the distribution of banks' profits. The Decision entered into force on 27th February 2021, it shall apply from 10th April 2021. With the entry into force of the Decision, the Decision published in 2020 expires. The measure was temporary and it was in force till 30th September 2021. Whereby in case of significant decrease of risks the Bank of Slovenia could revoke the measure early or in case of increased risk it could have extend its validity. During the period of validity of the Decision the bank profit could be distributed, if the Net bank profit for first quarter 2021 was positive, however it should not exceed the lower of the following conditions: a) 15% of accumulated profit on a bank solo level in years 2019 and 2020 or b) 0,2% of Common Equity Tier 1 ratio on a bank solo level as of 31st December 2020.

Template EU OV1 – Overview of total risk exposure amounts

CAPITAL REQUIREMENTS (Article 438)

Purpose: Provide an overview of total RWA forming the denominator of the risk-based capital requirements calculated in accordance with Article 92 of the CRR. Further breakdowns of RWAs are presented in subsequent parts of these guidelines.

On a consolidated level, the UniCredit Slovenia Group uses the following approaches in calculating capital requirements under the Pillar I:

- credit risk - standardized and foundation IRB approach
- market risk - standardized approach
- operational risk - standardized and advanced approach.

In calculating capital ratios, risk is expressed as a risk-weighted exposure or capital requirement. The minimum capital requirement for an individual risk is 8% of the total exposure to an individual risk

		RWAs		Minimum capital requirements
		31.03.2022	31.12.2021	31.03.2022
1	Credit risk (excluding CCR)	1,328,223	1,253,272	106,258
2	Of which the standardised approach	704,198	685,759	56,336
3	Of which the Foundation IRB (F-IRB) approach	615,772	559,521	49,262
4	Of which slotting approach			
EU 4a	Of which equities under the simple riskweighted approach	8,254	7,992	660
5	Of which the Advanced IRB (A-IRB) approach	-	-	-
6	Counterparty credit risk - CCR	12,929	18,162	1,034
7	Of which the standardised approach	12,929	18,162	1,034
8	Of which internal model method (IMM)	-	-	-
EU 8a	Of which exposures to a CCP	-	-	-
EU 8b	Of which credit valuation adjustment - CVA	-	-	-
9	Of which other CCR	-	-	-
15	Settlement risk	-	-	-
16	Securitisation exposures in the non-trading book (after the cap)	-	-	-
17	Of which SEC-IRBA approach	-	-	-
18	Of which SEC-ERBA (including IAA)	-	-	-
19	Of which SEC-SA approach	-	-	-
EU 19a	Of which 1250% / deduction	-	-	-
20	Position, foreign exchange and commodities risks (Market risk)	1,687	750	135
21	Of which the standardised approach	1,687	750	135
22	Of which IMA	-	-	-
EU 22a	Large exposures	-	-	-
23	Operational risk	107,260	107,690	8,581
EU 23a	Of which basic indicator approach	-	-	-
EU 23b	Of which standardised approach	10,205	10,215	816
EU 23c	Of which advanced measurement approach	97,055	97,475	7,764
24	Amounts below the thresholds for deduction (subject to 250% risk weight)	-	-	-
25	Other calculation elements	37,410	37,182	2,993
26	Total	1,487,509	1,417,055	119,001

Credit risk RWA increased compared to the previous quarter mainly due to new loans on corporate clients, partially neutralized by renewal of real estate collaterals on mortgage loans. Operational risk in Q1 2022 remained stable compared to 2021YE. Market risk slightly increased compared to 2021YE due to higher trading bond exposure. All these impacted the total RWA which increased by EUR 70m.

Template EU CR8 – RWEA flow statements of credit risk exposures under the IRB approach

CAPITAL REQUIREMENTS (Article 438)

Purpose: Present a flow statement explaining variations in the credit RWAs of exposures for which the risk weighted amount is determined in accordance with Part Three, Title II, Chapter 3 of the CRR and the corresponding capital requirement as specified in Article 92(3)(a).

		a	b
		RWA amounts	Capital requirements
1	RWAs as at the end of the previous reporting period (31.12.2021)	567,513	45,401
2	Asset size	52,002	4,160
3	Asset quality	466	37
4	Model updates	-	-
5	Methodology and policy	-	-
6	Acquisitions and disposals	-	-
7	Foreign exchange movements	-	-
8	Other	4,045	324
9	RWAs as at the end of the reporting period (31.3.2022)	624,025	49,922

LIQUIDITY REQUIREMENTS (Article 451a)

Purpose: Qualitative information on LCR, which complements template EU LIQ1

Evolution of LCR results

UniCredit Banka Slovenija d.d. maintains a sound liquidity position, high above the defined risk-taking limits according to Risk Appetite Framework. In the period from June 30th 2021 to March 31st 2022, the LCR of UniCredit Bank fluctuated between 199% and 263% (199% as of March 31st 2022). The value of high-quality liquid assets (HQLA) of UniCredit Banka Slovenija was at a high level and, in the mentioned period, amounted to between 649mio EUR and 782mio EUR (649mio EUR as of March 31st 2022). Regarding net liquidity outflows, these amounted to between 294mio EUR and 370mio EUR (327mio EUR as of March 31st 2022).

The most common reasons of the fluctuations of LCR in the period between June 30th 2021 and March 31st 2022 are: movements of deposits of financial and non-financial customers, changes in the maturity of loans in the period of thirty days, changes in the balance of Loro and Nostro accounts, early repayment of Supranational Funding and dividend payout.

In addition, the methodology update of LCR calculation, with regards to Article 23 items, had an effect on the weights and classification of the outflows of LCR. The introduction of this update had for the first time an impact on the LCR in June 30th 2021.

High-level description of the composition of the institution`s liquidity buffer

The liquidity buffer of UniCredit Banka Slovenija d.d. consists of the most liquid and available assets, which can be used in the event of stressful scenarios and conditions, within a short period of time. The liquidity buffer includes cash, balance with the Central Bank (excluding mandatory reserves) and unencumbered high-quality debt securities.

Explanations on the actual concentration of funding sources

The main financing sources of the Bank are customer deposits, providing a very stable and diverse base, where the main contributors are Retail and Corporate clients' deposits, complemented by Targeted longer-term refinancing operations (TLTRO III).

UniCredit Banka Slovenija d.d. is not dependent on financing via interbank market.

The Bank considers the concentration of funding in its Business strategy, ensuring a balanced portfolio and preventing the side effects of concentration.

Derivative exposures and potential collateral calls

The Bank concludes transactions with derivative financial instruments for the purpose of managing interest rate and foreign exchange risks.

Bank offers such products to its Corporate Customers for the purpose of hedging their financial risk (foreign exchange, interest rate and commodity risk).

The majority of derivative financial instruments in the portfolio consists of financial instruments for hedging interest rate positions of the Banking Book.

ISDA agreements and Credit Support Annex (CSA) are in place for Financial counterparties.

With regards to Corporate customers, UniCredit Banka concludes derivatives transactions on the basis of Master Agreements for derivatives. For each client there is portfolio coordination in place in compliance with European Market Infrastructure Regulation (EMIR).

From the LCR perspective, the exposure to derivative financial instruments does not have a significant impact on Net Outflows.

Currency mismatch in the LCR

The Bank actively manages its liquidity risk exposure to foreign currencies in accordance with the regulations of the UniCredit Group and the international regulations of the European Central Bank. Given the fact that the Bank's main currency is Euro, the Bank reports the LCR in Euro. Additionally to the reporting in the main currency, the Bank also reports LCR in terms of all currencies on which it has positions.

Other items in the LCR calculation that are not captured in the LCR disclosure template but that the institution considers relevant for its liquidity profile

The LCR calculation does not include any other items that are not already included in the LCR disclosure table. The operations of the Bank are mainly focused on retail and corporate clients; and its balance sheet does not include complex products. Moreover, the liquidity of the Bank is stable and the volume of unencumbered liquidity reserves is adequate.
