Objectives and Investment Policy (Source: Amundi)

This Sub-Fund seeks to achieve capital appreciation over the recommended holding period by investing in a diversified portfolio of the permissible instruments described below. This Sub-Fund invests primarily, either directly or, indirectly, through open-ended UCIs and UCITS, in equities and equity-linked instruments. The Sub-Fund may also invest up to 30% of its assets, either directly or, indirectly, through open-ended UCIs and UCITS, in Money-Market Instruments, debt and debt-related instruments including convertible bonds and bonds with warrants attached, deposits subject to call with a maximum term of 12 months, and interest rate certificates. The Sub-Fund seeks to achieve its investment objective through an active and flexible allocation to these assets classes and aims to control volatility by applying a disciplined risk budgeting process. The Sub-Fund actively manages currency exposure and may hold positions in any currency in connection with its investments. Investment in underlying funds is made using in-house research techniques to evaluate the people involved, the team structure and experience, the investment philosophy, the key management and administration policies and processes (e.g. risk management, remuneration) of those underlying funds. Past performance is assessed in relation to the underlying funds' risk in different markets conditions and in the context of relevant peer groups.
