The following tables show the main differences between the Merging Sub-Funds and the Target Sub-Funds:

i. Merger of “Amundi UniCredit Premium Portfolio – Dynamic” into “Amundi Fund Solutions – Sustainable Growth”

Merging Sub-Fund:	Target Sub-Fund:
Investment Objective/Policy	
<p>The Sub-Fund seeks to achieve capital appreciation over the recommended holding period by investing in a diversified portfolio of the permissible instruments described below.</p> <p>This Sub-Fund invests primarily, either directly or, indirectly, through open-ended UCIs and UCITS, in equities and equity-linked instruments. The Sub-Fund may also invest up to 30% of its assets, either directly or, indirectly, through open-ended UCIs and UCITS, in debt and debt-related instruments including convertible bonds and bonds with warrants attached, interest rate certificates and, in order to achieve its investment goals and/or for treasury purposes and/or in case of unfavourable market conditions, Money-Market Instruments and Credit Institution Deposits.</p> <p>The Sub-Fund seeks to achieve its investment objective through an active and flexible allocation to these assets classes and aims to control volatility by applying a disciplined risk budgeting process. The Sub-Fund actively manages currency exposure and may hold positions in any currency in connection with its investments.</p> <p>The Sub-Fund is actively managed. The 80% MSCI World Index – 20% €STR serves a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee benchmark used by relevant unit classes, for calculating the performance fees. There are no constraints relative to any such benchmark restraining portfolio construction.</p> <p>This Sub-Fund integrates Sustainability Factors in its investment process and takes into account principal adverse impacts of investment decisions on Sustainability Factors as outlined in more detail in Section “Sustainable Investing” of the Prospectus.</p> <p>Given the Sub-Fund's investment focus, the investment manager of the Sub-Fund does not integrate a consideration of environmentally sustainable economic activities (as prescribed in the Taxonomy Regulation) into the investment process for the Sub-Fund. Therefore, for the purpose of the Taxonomy Regulation, it should be noted that the investments underlying the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities.</p>	<p>The Sub-Fund seeks to achieve capital appreciation over the recommended holding period by investing in a diversified portfolio of the permissible instruments described below.</p> <p>The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation. For further details on how the Sub-Fund complies with the requirements of the Disclosure Regulation, the Taxonomy Regulation and the RTS, please refer to Appendix V – ESG Related Disclosures to this Prospectus.</p> <p>The Sub-Fund seeks to provide attractive risk-adjusted returns through exposure to a diversified portfolio of funds that invest in companies with fundamental value propositions, and with strong ESG profiles or demonstrating ESG improvement. The Sub-Fund is characterised by an actively managed allocation across a broad and diversified range of asset classes and managers, with an investment framework focusing on assets and manager selection which seek to generate long-term sustainable capital growth. The Investment Manager uses its own economic analysis and a top-down approach to determine the most attractive asset types and geographical regions and, within those, the optimal manager selection to gain exposure to those asset classes.</p> <p>The Sub-Fund invests primarily in open-ended UCIs and UCITS pursuing a diverse range of investment strategies. The Sub-Fund may also invest in equities and equity linked instruments, debt and debt-related instruments (including convertible bonds and bonds cum warrants), interest-rate certificates and, in order to achieve its investment goals and/or for treasury purposes and/or in case of unfavourable market conditions, in Money-Market Instruments and Credit Institution Deposits.</p> <p>The Sub-Fund may seek exposure to commodities and real estate through investment in eligible transferable securities, indices and other liquid financial assets (either directly or indirectly through open-ended UCITS or UCI). The Sub-Fund may invest up to 20% of its assets in eligible commodity-index certificates. The Sub-Fund may also invest in UCITS or UCIs following alternative strategies.</p> <p>The Sub-Fund integrates Sustainability Factors in its investment process and considers principal adverse impacts. When investing in third party managers it does consider principal adverse impacts of investment decisions on Sustainability Factors as long as information is available as outlined in more detail in section “Sustainable Investing” of the Prospectus and in Appendix V – ESG Related Disclosures to this Prospectus.</p> <p>The Sub-Fund's sustainable investment strategy is based around three allocations themes:</p> <ul style="list-style-type: none"> • ESG Leaders – UCITS/UCIs that employ best-in-class ESG screening • ESG Improvers - actively managed UCITS/UCIs aiming to deliver alpha by taking exposure to companies that embrace, or will embrace, a positive ESG trajectory within their business

- Sustainable funds – other actively managed UCITS/UCIs (pursuant to article 8 or article 9 of the Disclosure Regulation) that seek long term sustainable capital growth

Further, the Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the investment universe. The aggregate ESG score and rating (A to G - as detailed in section “Sustainable Investment” of the Prospectus) for the Sub-Fund (using the weighted average ESG score of underlying UCITS/UCIs and other securities) is compared with the ESG rating of its investment universe.

The Sub-Fund is actively managed. The 30% Bloomberg Euro Aggregate Index / 70% MSCI AC World Index serves as a reference benchmark for calculating and monitoring the Sub-Fund’s relative Value-at Risk. There are no constraints relative to this benchmark restraining portfolio construction and the extent of deviation from such index is expected to be significant. Further the Sub-Fund has not designated the Benchmark as a reference benchmark for the purpose of the Disclosure Regulation.
